

The Block Pit

Instead of gathering resources from Pyrrhia or Pantala, you can easily gather materials at the Block Pit.

Locating the Block Pit

You can find the Block Pit at the Hub.

1. Use the command `/hub` to go to the Hub.
2. Go into the blue building labeled **Server Events and Minigames**.
3. Continue walking down the path until you pass under a bridge.
4. The entrance to the Block Pit is on the left, directly across from the statue of the one and only fred.

Using the Block Pit

When you enter the Block Pit, you'll first enter a viewing platform with a section of the floor made of cyan terracotta. You can place shulker boxes on the terracotta floor.

Inside the Block Pit, you can break blocks in all of the ten block zones. You cannot place blocks in the block zones. Each zone has a large rotating block display called the Current Block that shows which block that zone is set to. All zones will periodically refill if no player is located inside them. You can trigger a refill manually by right-clicking the Current Block if no player is inside.

Each zone has multiple blocks which can be set to fill. You can left-click the Current Block to advance through a zone's cycle. This will also change all blocks inside the zone and refill if no player is inside. The next block in the cycle is shown as a small rotating block below the Current Block.
